

# Recycle your old, second refrigerator today! Enjoy cold hard cash.

## Save energy. Save money.

Did you know your old refrigerator uses up to four times more electricity than a new one? Save that extra energy, and you could save up to \$150 a year on your electricity usage.

That's a good reason to let us recycle your old, second refrigerator or freezer. This offer was previously only available for residential customers but beginning July 1st 2014, in addition to our existing energy saving solutions, small business customers can also get cash for their old refrigerators. We'll even haul it away for FREE and give you a \$50 reward!

Recycling that fridge will keep 10 tons of carbon dioxide out of the atmosphere, which means a lot more clean air for our future.

To schedule a FREE pickup, please call **1-877-545-4113** or visit **www.nationalgridus.com/smallbusinessne**

Offer is available to National Grid's Massachusetts small business electric customers. National Grid contracts with JACO Environmental, an appliance recycler, to pick up and recycle old, second refrigerators and freezers that are in working condition. The unit must be between 10 cubic feet and 30 cubic feet in size, using inside measurements. Customer may recycle a maximum of two units per calendar year for a maximum rebate of \$100. Offer is subject to change or cancellation at any time. Savings and energy efficiency experiences may vary. © 2015 National Grid
