

Small Business Program

St Francis of Assisi Parish Center

“

It's really great that National Grid had this program. We needed our lighting replaced and this came at a really good time.

”

St Francis of Assisi Parish Center

Serving the community since 1872 by offering a facility for Bingo, cub scouts and girl scouts, religious instruction and summer programs. The Parish had been wanting to improve the lighting in the center for a long time but had to delay the project due to financial reasons. When they learned of the Small Business Program from National Grid they were finally able to replace the lighting because National Grid covered up to 70% of the project costs.

The Parish paid their share of the project costs up front taking advantage of a 15% discount.

Savings Summary

They installed 40 Fluorescent 6lamp 4FT T8 HL Fixture with Gymguard.

Project Cost: \$13,965

Customer Cost: \$6,506

NG incentive: \$7,459
