

# Learn with the Sustainability Hub

National Grid Sustainability Hub is excited to offer a variety of Learning Modules and activities for all grade levels. Each module consists of an **educational presentation** accompanied by **hands-on activities**.

## Introduction to Sustainability

A first lesson on sustainable practices and what it means to be sustainable.

## Climate Change

This module clears confusion about global warming with facts about climate change. Afterwards, take the Climate Change Medication Pledge to end global warming.

## Waste Management

How much “waste” do we make and where does it go? What’s the best way to recycle it? This module answers these questions, followed by a waste sorting race.

## Hydro Power and Wind Power

Learn about these clean ways of generating electricity, and make your own version of a water wheel or wind turbine!

## Sustainable Smart Phone Apps

There are a variety of technologies available for smart phones to help you become more sustainable and use less energy. Try some of them yourself!

## Sustainable Building

What makes a home sustainable, and how can you build the most sustainable house possible? Afterwards, use your new knowledge to build a mini sustainable house.
